

First Floor

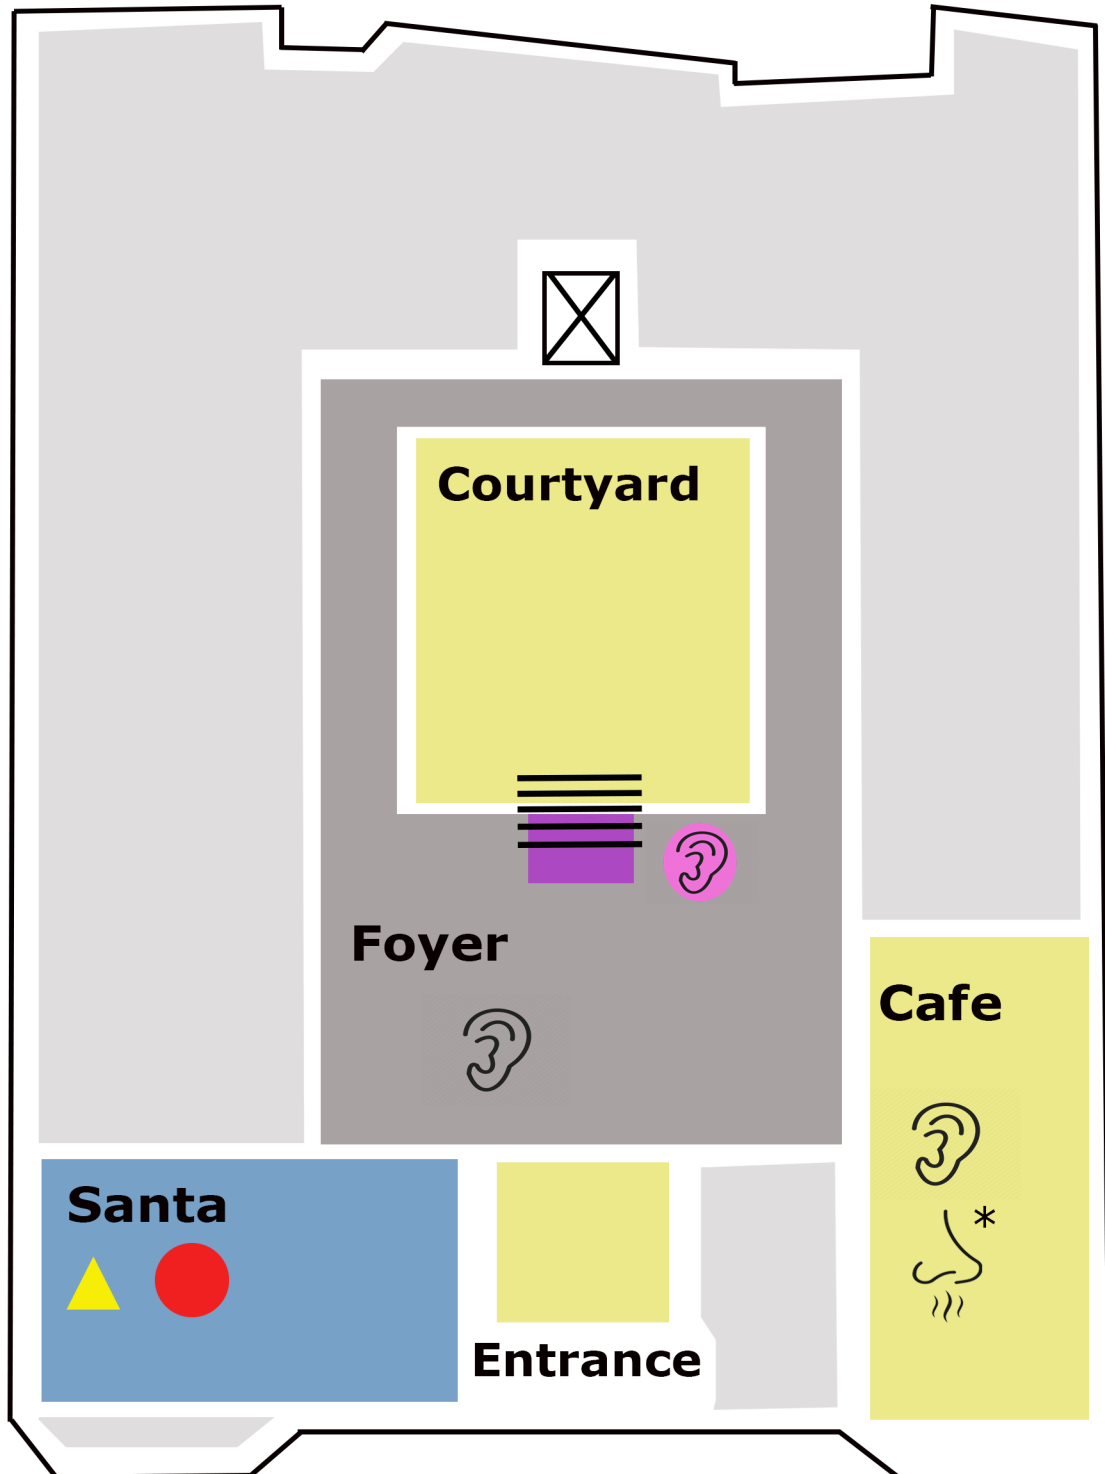

The soundscape for Solstice is at a similar level to a chatty cafe, with background music (minus the loudness of coffee machines). There will be no sudden noises.

* The soundscape is loudest in the summer rooms

* The Winter room is the darkest of the experience.

Ground Floor

* In the cafe we sell coffee, alcohol and food such as paninis, bagels and pizza.

Performance

Glowing Structures

* For example, in the Spring Room there are 6 large eggs that are lit from the inside, making them glow.

Festoon Bulbs/Fairy lights

Lighting

Along the Solstice walking trail there is no natural light. All the windows are blacked out.

Spring and Summer are the brightest parts of the experience, Winter is the darkest.

In all rooms the whole floor will be lit with dappled lighting. The ceilings and walls will not be lit.

Each space will have structures that are either lit internally or from overhead, as though they are glowing.

The Santa Grotto will be lit with strings of festoon lightbulbs.
